Liquid Document

Sourcing International Limited - Liquid requirements and disclaimer for all new liquids packed on our site. Due to the varied and unusual product development in the marketplace, we wish to make all customers aware of some of the pitfalls and challenges with canning some liquids. Sourcing International Limited recommends that you arrange to carry out a 'Liquid Compatibility Test'. We can facilitate this for you. The cost is about £2,00 + Vat. The report will enable you to make the right decisions about your product and give you complete peace of mind.

Alcohol Strength, Low Ph & High levels of Sulphites, Quinine, Citric Acid and Acesulfame K, any other components that may react with the liner or aluminium can.

Please ensure that you provide as much information as possible when booking slots for production. Our team will do their best to work with you, so we both get the right outcome.

Disclaimer

If you do not want to go to the expense of a 'Liquid Compatibility Test' then you are required to fill in your details below and sign to say you take full responsibility for the liquid and the canning of said liquid. Sourcing International Limited will not take any responsibility for any new liquid that is sent into them that has not been tested. This is purely because we do not know how some liquids are going to react to the can.

I the undersigned take full responsibility for the finished product packed by Sourcing International Limited.
